

Active Video Splitter - AVS97

- The Active Video Splitter, AVS97, gives you four outputs each 1 V Peak to Peak, composite video.

- With the AVS the input is split four ways and each of the feeds are amplified. Each of the four outputs from the AVS are at the same level as the input.

- The unit has a built in 230v mains power supply. It can be either rack mounted in half a 1U space, attached to a wall or left free standing.

- **Technical Specification**

- **Video Input:** Requires $\times 1$ V Peak to Peak, composite video
- **Video Output:** 1 V Peak to Peak on each of the four outputs
- **Power:** 200 - 240 V, 50 - 60 Hz at 5 VA IEC connector. L.E.D indicator for power 'on'
- **Mounting:** 2 units side by side in 1U 19" standard rack. 2 holes for wall fixing.
- **Dimensions:** 200 mm \times 95 mm \times 40 mm, with 10 mm fixing flanges.
- **Weight:** 1.5 kg.
